

**Specification Sheet** 

# PowerEdge R6725

## **Versatility Meets Performance**

The new Dell PowerEdge R6725 is designed to be the foundation of your data center. This powerful server provides excellent performance, low-latency storage options and compute density in an air-cooled configuration.

#### Breakthrough performance density

Delivering breakthrough performance density with multiple configuration options for traditional and emerging workloads including AI, high-performance compute (HPC), virtual desktop integration (VDI) and dense virtualization.

#### Striving for next-level compute

Our partnership with AMD allows us to provide customers with a powerful 2-socket 1U server that can handle a variety of workloads. The PowerEdge R6725 offers great flexibility with multiple configuration options to suit diverse customer needs.

- Maximize performance with two AMD 5<sup>th</sup> Generation EPYC<sup>™</sup> processors.
- Memory density with DDR5 (up to 3 TB of RAM)\* memory capacity.
- Up to 3 x Gen 5 PCle slots\* and dual OCP offering flexibility to meet workload requirements.

#### Energy Efficiency through consolidation

Lower your total cost of ownership while reducing energy consumption and make the best use of existing data center space.

- Smart Cooling design allows most configurations to be air-cooled.
- Improved heat sinks for better thermal performance.

#### Cyber Resilient Architecture for Zero Trust IT environment & operations

Security is integrated into every phase of the PowerEdge lifecycle, including protected supply chain and factory-to-site integrity assurance. The Silicon-based root of trust anchors end-to-end boot resilience while Multi-Factor Authentication (MFA) and role-based access controls safeguard trusted operations.

#### Increase efficiency and accelerate operations with autonomous collaboration

The Dell OpenManage systems management portfolio tames the complexity of managing and securing IT infrastructure. Using Dell Technologies' intuitive end-to-end tools, IT can deliver a secure, integrated experience by reducing process and information silos to focus on growing the business. The Dell OpenManage portfolio is the key to your innovation engine, unlocking the tools and automation that help you scale, manage, and protect your technology environment.

### Sustainability

From recycled materials in our products and packaging, to thoughtful, innovative options for energy efficiency, the PowerEdge portfolio is designed to make, deliver, and recycle products to help reduce the carbon footprint and lower your operation costs. We even make it easy to retire legacy systems responsibly with Dell Technologies.

#### Rest easier with Dell Technologies Services

Maximize your PowerEdge Servers with comprehensive services designed to meet you wherever you are. Accelerate time to value in achieving high AI use cases with Professional Services for AI, choose from tailored deployment options with the ProDeploy Suite, receive proactive and predictive support with our ProSupport Suite, and so much more with our services available across 170 locations and backed by our 60K+ employees and partners

#### PowerEdge R6725

Dell PowerEdge R6725 is ideal for a variety of workloads:

- High-performance compute (HPC)
- Virtual desktop integration (VDI)
- Dense virtualization
- Artificial Intelligence (AI)

\*Expected to be available in the first half of 2025. Planned Offerings are subject to change and may not be released as originally designed.

Processor   Two 5 <sup>th</sup> Generation AMD EPYC 9005 Series processors with up to 192 cores per processor*	Feature	Technical Specifications		
Memory   2 4 DDR5 DIMM slots, supports RDIMM 3 TB max*, speeds up to 6000 MT/s   Supports registered ECC DDR5 DIMMs only
